

Special Offset-Printer

Type of machine	CP 1MiH
Type of printing	offset printing
Drive	optional
Automatical synchronisation with line	no
Number of printing stations	1
Printing direction	l.→r. / r.→l.
Maximum printing diameter	ø 8,0 mm - 25,0 mm
Lift column manual adjustable	yes
Print height adjustment	900 mm - 1200 mm
Maximum printing speed	60 m/min
Printing wheel diameter	ø 80 mm
Offset wheel diameter	ø 160 mm
Mounting hole diameter	16 mm
Suitable for plane printing wheels	yes
Suitable for concave printing wheels	no
Suitable for embossing / indenting wheels	no
Inline stroboskop lamp (synchronized)	no
Viscosity control system	no
Movable machine	optional
Power supply if motorised	400 V · 50 Hz · 3 Ph
Weight machine	approx. 40 kg

Special offset printing machine CP 1MiH
 Cable printer CP 1MiH is a special single head-printing machine. The cable printer is traction-driven and optionally available with motorised assistance.

The printing image is located on the top of the printing object, which allows an easy quality inspection. The CP 1MiH has been designed especially for big cables, rigid pipes, tubes and profiles.
